PROFILE:

Detail-oriented gradating software engineering student with skills in utilizing a variety of platforms; effective communication skills to explain complex software issues to clients. Supportive and enthusiastic team player dedicated to streaming process and efficiently resolving project issues. Willing to take ownership of core components.

SUMMARY OF QUALIFICATIONS:

Currently enrolled in the Software Engineering Technology Advanced Diploma program at Centennial College
Self-starter, disciplined, confident, and result-oriented in complex, deadline-driven operations
Strong interpersonal skills with the ability to work in a diverse environment and ability to work under pressure.

TECHNICAL SKILLS:

Familiar with

Web Application and Android App Application Development:	C#, Asp.net, .Net Core 2.1, JavaScript, Typescript, Java, HTML5/XML, JSON, CSS, Bootstrap, Web API, Restful API, Swagger, Postman, Agile Methodologies, and UML language skills.
Databases:	Oracle SQL, PL/SQL, MySQL, and Microsoft SQL Server.
Business Intelligence:	Data Mining, SSIS, SSRS, SSAS, and Statistical Analysis System (SAS).
AWS Development:	EC2, Lambda, Elastic Beanstalk, S3, RDS, DynamoDB, Route 53, IAM, and CloudWatch.
Software Testing & Quality:	Selenium, TestNG, Maven, Jenkins, Git, and GitHub
Operating Systems:	Unix/Linux, Windows, and Computer Networking.
Development Tools:	Microsoft Expression Web, Visual Studio, Visual Studio Code, Android Studio, Eclipse, Visual Paradigm, Visio, and IntelliJ.
Mean Stack Development:	MongoDB, Express, Angular.js, and node.js
Apigee API Management:	

EDUCATION:

Software Engineering Technology Advanced Diploma   Sept. 2016 Present
Centennial College, Toronto, Ontario   **Expected Graduation: April 2019**
Overall GPA 4.027/4.5 – maintaining honours status throughout the course

ACADEMIC PROJECTS:

Flash Chat App (Winter 2018)
I created a Flash Chat app, which is a real massaging app like WhatsApp or Facebook messenger. For creating this app, I used Java, XML, and google Firebase database for storing user SMS and credentials. The purpose of this app to create something comparable to Facebook massager.

WorkForce API (Fall 2018)
I created a WorkForce web API for unemployed educated people who are looking for a job. The potential customer of the WorkForce is an employer, but it can be consumed for many different purposes. For developing WorkForce, I used, C# .Net Core2.1, AWS-RDS, swagger, JSON, XML, Postman, Apigee API management platform, and hosted on AWS Elastic Beanstalk. My role was creating API, documenting, testing and securing API through Apigee API Security management.

eAppointment (Fall 2017)
It is a software development project, designed for an online doctor appointment application with eight subsystems which will enable users to find the nearest doctors and at the earliest possible time to set doctor's appointments. Using, UML Language, and Agile methodology. It was a group project and my role was creating use case diagram, use case description, ERD diagram, and domain class diagram.

Favorite Books (Feb 2019)
I created favorite books application with user authentication. For developing the application, I used node.js, express, ejs, mLab, CSS, Bootstrap, GitHub and hosted on herokuapp.com.
